

Renderer feature showcase

Rounded boxes & outlines

A card box with a rounded background and matching border.

Outline keeps focus indicators visually distinct from borders.

Typography

Bold, *italic*, highlighted, inserted, deleted, HTML, monospace, x^2+y^1 ,
large, and a [styled link](#).

Double-underline emphasis.

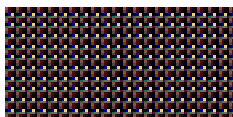

Dotted-underline note.

CSS counters

01. Counters automatically number each item.
02. Mid-document ordinals are reliable...
03. ...even across CSS counter() and counter-style.

Images

Inline raster:  and a background-image carrying the same PNG:

Quotes

Generated quotes via **KqM** **The best way to predict the future is to invent it.**

Definitionlist

Phase 1L

Image painting — data: URLs + baseDir-resolved local files.

Phase 1H

Table layout — currently deferred.

Form fields(static)

Name: **Alice Example** Email: **aliceOexample.com** ☐

(PDF AcroForm fieldgeneration lands in Phase 2; these render as static text snapshots.)

Tables

Feature	Spec	Status
Inline images (data:)	HTML 5 §4.8.3	Done
